# YOKOGAWA with EPLAN

## Efficient Design and Engineering

EPLAN provides a web-based engineering tool to improve engineering work and documentation quality. With the EPLAN Data Portal, you can easily find complete drawings of devices or components of Yokogawa's offerings, which include FA-M3, UTAdvanced, and SMARTDAC+.

This tool ensures that you can address vast engineering documents more efficiently when developing a comprehensive project design.

## Product Line-up

### Programmable Logic Controllers

**FA-M3V**  
VITESSE™

The FA-M3 is designed and best known for its speed so it's only natural that the new series be named FA-M3V, where V stands for "Vitesse", which means speed in French. From day one, FA-M3 has relentlessly pursued higher speeds as the most effective means to solving customer challenges.

### Temperature PID Controllers

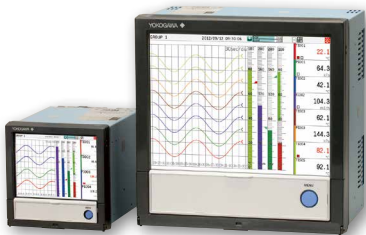

**UTAdvanced®**

UTAdvanced Temperature Controller employs an easy-to-read, 14-segment large color LCD display, along with navigation keys, thus greatly increasing the monitoring and operating capabilities. It also supports open networks such as Ethernet communication. DIN rail mounting controllers have been added.

### Paperless Recorders

**SMARTDAC+®**

The GX10/GX20 is a paperless recorder that provides intuitive operation through a touch screen.

Its modular architecture supports a wide array of input/output modules, with even more modules available soon.

Its custom graphics accommodates application or process-specific displays.
